Originating from the Lucca region, Colemanite is an Italian marble that stands out for its intense and spectacular appearance. Also known as Ombra di Caravaggio, it owes its name to the drama imparted by its dark and deeply expressive surface, which recalls the essence of the Baroque painter's works.

The white and copper veins that run through its background provide a contrast full of character, ideal for designs with a strong visual identity. Thanks to its sculptural presence and its ability to transform the ordinary into the extraordinary, Colemanite is a collection that leaves a lasting impression.
