Where light becomes *color*

Some surfaces absorb light. **Glint** ignites it, transforming it into colour. Mirage reinterprets traditional glossy glazed ceramics in porcelain stoneware, through a range of sizes spanning from the 6x24 brick to the 120x278 large-format slab, with the versatile 60x120 in between, bringing chromatic intensity and luminosity to every scale of design. Here, colour is not simply a surface treatment, but a phenomenon that comes alive and transforms with the light.

Ci sono superfici che assorbono la luce. **Glint** la accende e diventa colore. È la reinterpretazione in gres porcellanato Mirage della tradizionale ceramica smaltata lucida, sviluppata in una gamma di formati che va dal brick 6x24 fino alla grande lastra 120x278, passando per il più eclettico 60x120, per portare intensità cromatica e luminosità a ogni scala di progetto. Il colore non è un trattamento di superficie ma un fenomeno che vive e cambia con la luce.
