TURA TEXTURE 160X320

Connection with nature and a lot of personality is what Tura manifests. A real collection of digitized fossils that is capable of imparting a texture throughout its thickness through successive layers of scales on the material. On a design filled with beauty and history, a fossil world gleams through innovative decorative techniques, allowing us to touch and feel nature with our own hands.

Conexión con la naturaleza y mucha personalidad, es lo que pone en manifiesto Tura. Una colección real de fósiles digitalizados que es capaz de dotar sobre el material una textura en todo su espesor a través sucesivas capas de escamas. Sobre un diseño repleto de belleza e historia vislumbra un mundo fósil gracias a las innovadoras técnicas decorativas, permitiéndonos tocar y sentir la naturaleza con nuestras propias manos.

La connexion avec la nature et beaucoup de personnalité, voilà ce que manifeste Tura. Une véritable collection de fossiles numérisés capable d'imprimer une texture sur toute son épaisseur grâce à des couches successives d'écailles sur le matériau. Sur un design rempli de beauté et d'histoire, un monde fossilisé brille grâce à des techniques décoratives innovantes, nous permettant de toucher et de ressentir la nature de nos propres mains.

* The continuous pattern between pieces could have a 3 cm deviation at the most. This disposal might be requested as special order at an additional cost, by default it is supplied randomly. La continuidad gráfica entre piezas puede tener una desviación máxima de 3 cm. Esta disposición se suministra bajo pedido con un coste adicional, por defecto se suministra de forma aleatoria. La continuité graphique entre pièces peut avoir une déviation maximale de 3 cm. Cette disposition est fournie sur commande et implique un coût supplémentaire, par défaut, il est fourni de façon aléatoire.

CLEANING POST- INSTALLATION

After the ceramic sheets have been laid, they must be protected to prevent them from getting damaged until all onsite work has been completed.

Before proceeding to give the tiled surface a final clean, wait for a prudent length of time (approximately 24 to 48 hours) so that the grouting material can set properly. In the case of polished porcelain sheets, once they have been grouted, they should be cleaned with a damp sponge before the grout can harden.

In general, a neutral or alkaline detergent like Acid Net should be used to clean away cement or grout residues. If epoxy-based grouts are used, clean away any remains as soon as the joints have been grouted, using a sponge and plenty of clean water. Then clean the surface thoroughly with an alkaline detergent, following the instructions on the product label. To care for the tiled surface, use a neutral detergent. To clean and care for the tile joints, use products specifically designed for this purpose.

Tras la instalación del material cerámico es imprescindible la protección del mismo para impedir posibles daños hasta la finalización de la obra.

Antes de realizar la limpieza final de obra es necesario respetar un tiempo de espera prudencial de 24-48 horas aprox., con el fin de que tenga lugar el correcto fraguado del material de rejuntado. En materiales porcelánicos pulidos, una vez rejuntado el material debe limpiarse con una esponja húmeda antes que el material de rejuntado se haya endurecido.

Como norma general se recomiendan productos ácidos tipo Acid Net teniendo en cuenta que no entren en contacto con los metales, siempre diluidos, para la limpieza de restos de cemento, juntas cementosas... En

el caso de utilizar para el rejuntado productos epóxicos, eliminar los residuos inmediatamente después de las operaciones de colocación, utilizando una esponja y abundante agua limpia. Realizar a continuación una limpieza a fondo con la ayuda de detergentes alcalinos. En el mantenimiento del revestimiento utilizar detergentes neutros, y en la limpieza y mantenimiento de las juntas, utilizar productos especiales a tal fin.

Après l'installation du matériau céramique, il est indispensable de protéger le matériau pour empêcher d'éventuels dommages jusqu'à l'achèvement des travaux.

Avant de réaliser le nettoyage final du chantier, il est nécessaire de respecter un temps d'attente d'environ 24-48 heures, pour permettre la bonne prise du matériau de jointoiment. Pour les matériaux porcelainés polis, une fois le jointoiment réalisé on devra nettoyer le matériau à l'aide d'une éponge humide avant que le matériau de jointoiment ne durcisse.

En règle générale, nous recommandons des détergents neutres ou basiques comme par exemple Basic Gel pour le nettoyage des restes de ciment, mortier de jointoiment... En cas d'utilisation pour le jointoiment de produits époxy, éliminer les résidus immédiatement après les opérations de pose, en utilisant une éponge et de l'eau claire en abondance. Réaliser ensuite un nettoyage à fond à l'aide de détergents alcalins, en veillant à suivre les indications indiquées sur les étiquettes des produits utilisés. Pour l'entretien du carrelage céramique, il est conseillé d'utiliser des détergents neutres, et pour l'entretien des joints, utiliser des produits spécifiques à cette fin.

SUSTAINABLE DEVELOPMENT

XTONE is a firm committed to the environment and sustainable development through eco-sustainable production processes and the manufacture of more innovative products with the aim of minimizing environmental impact.

The XTONE production plant, inaugurated in 2023, promotes energy self-consumption and 100% recovery of resources. With a total of 4,475 solar panels, some of the sustainable measures carried out in these facilities are the recovery of 100% of the heat from the oven for drying processes, the reuse of 100% of the water through a treatment plant for industrial use and the recycling 100% of waste for reintroduction into the production system: REGAIN – full recovery system.

That is why behind each XTONE product, there is an environmental commitment through the creation of sustainable projects that contribute to a better future.

XTONE es una firma comprometida con el medio ambiente a través de procesos de producción ecosostenibles y la fabricación de productos más innovadores con el objetivo de minimizar el impacto ambiental.

La planta de producción de XTONE, inaugurada en 2023, impulsa el autoconsumo energético y la recuperación de recursos. Con un total de 4475 placas solares, en estas instalaciones se realiza la recuperación del 100% del calor del horno para los procesos de secado, la reutilización del 100% del agua mediante depuradora para su uso industrial y el reciclaje del 100% de las mermas: un sistema de recuperación completa de recursos – REGAIN.

Suponiendo un ahorro considerable en materias primas,

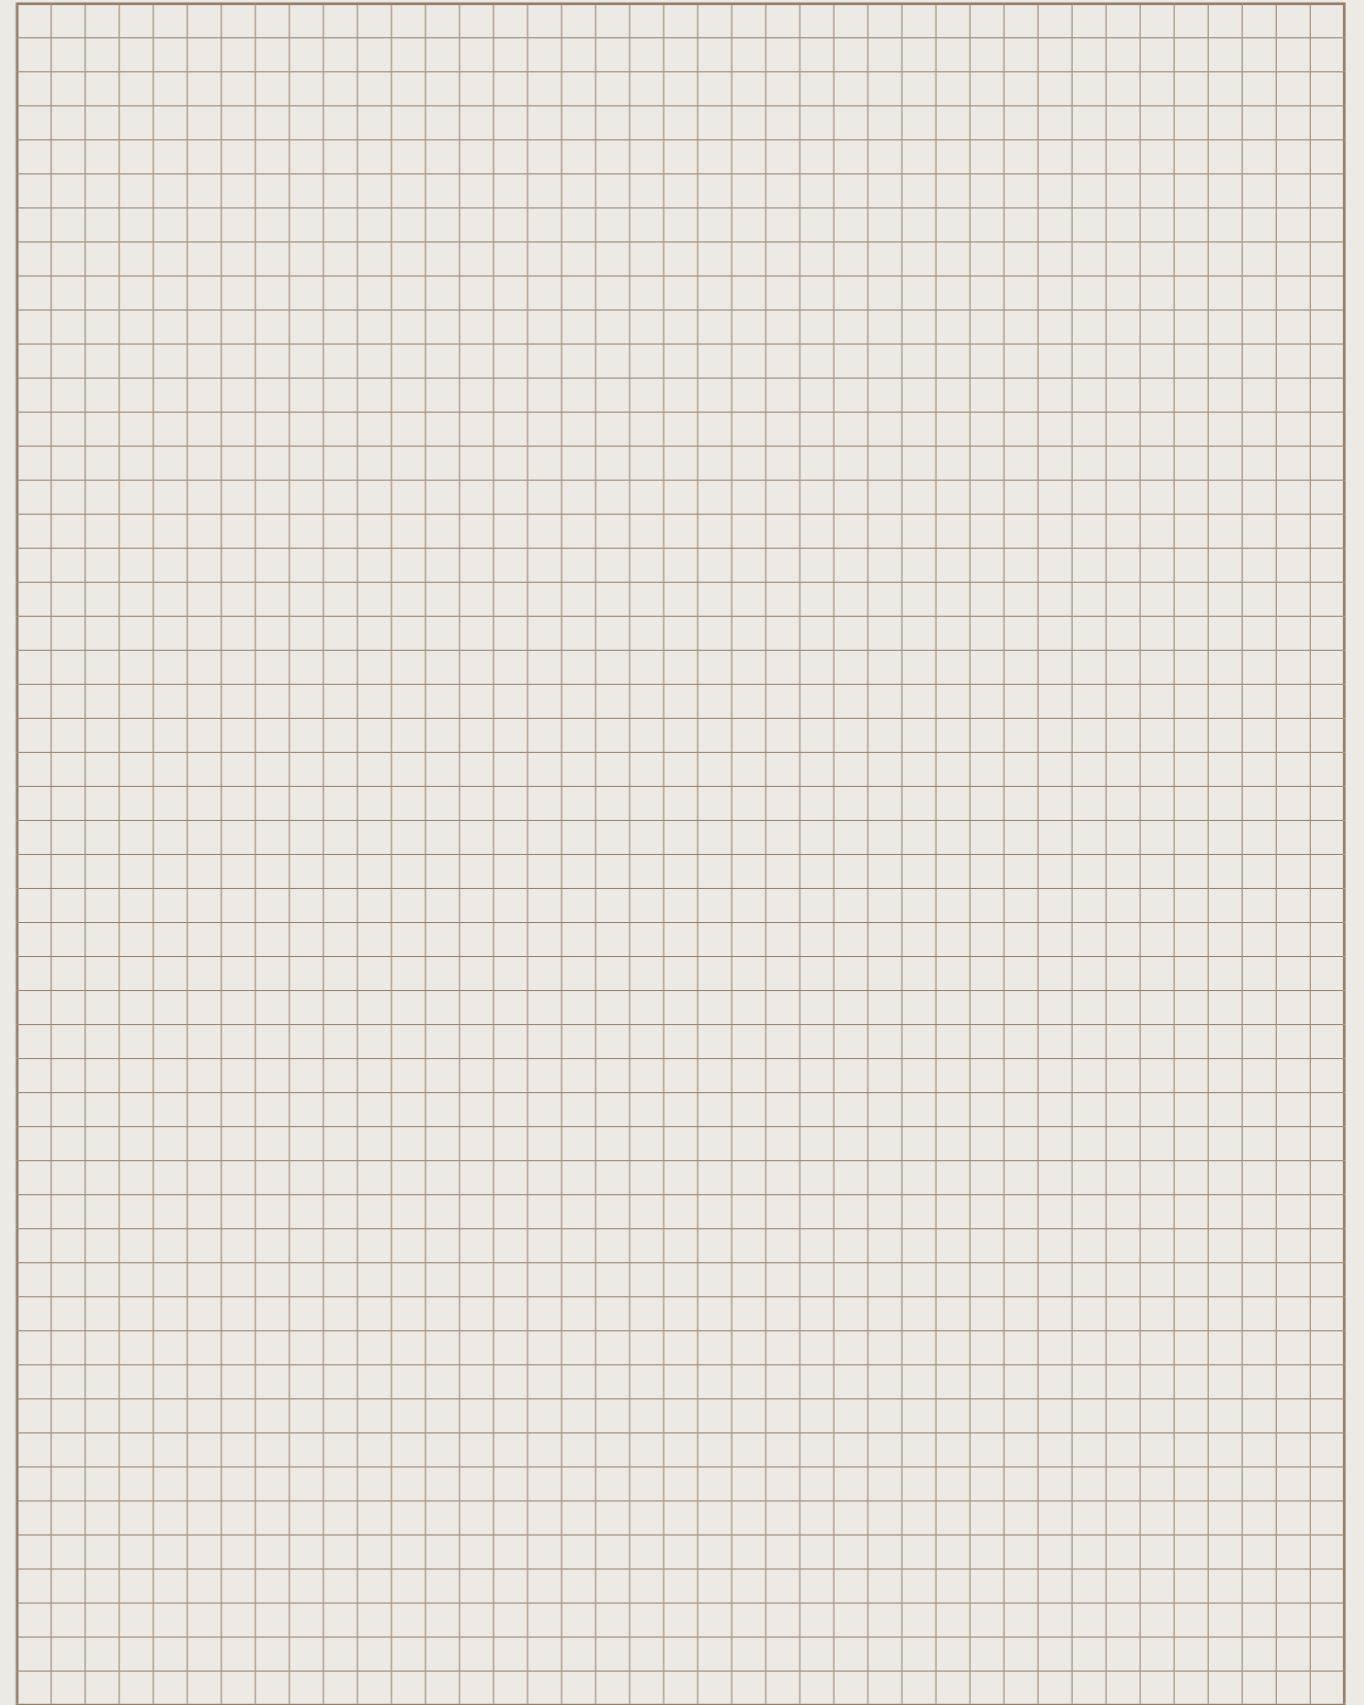

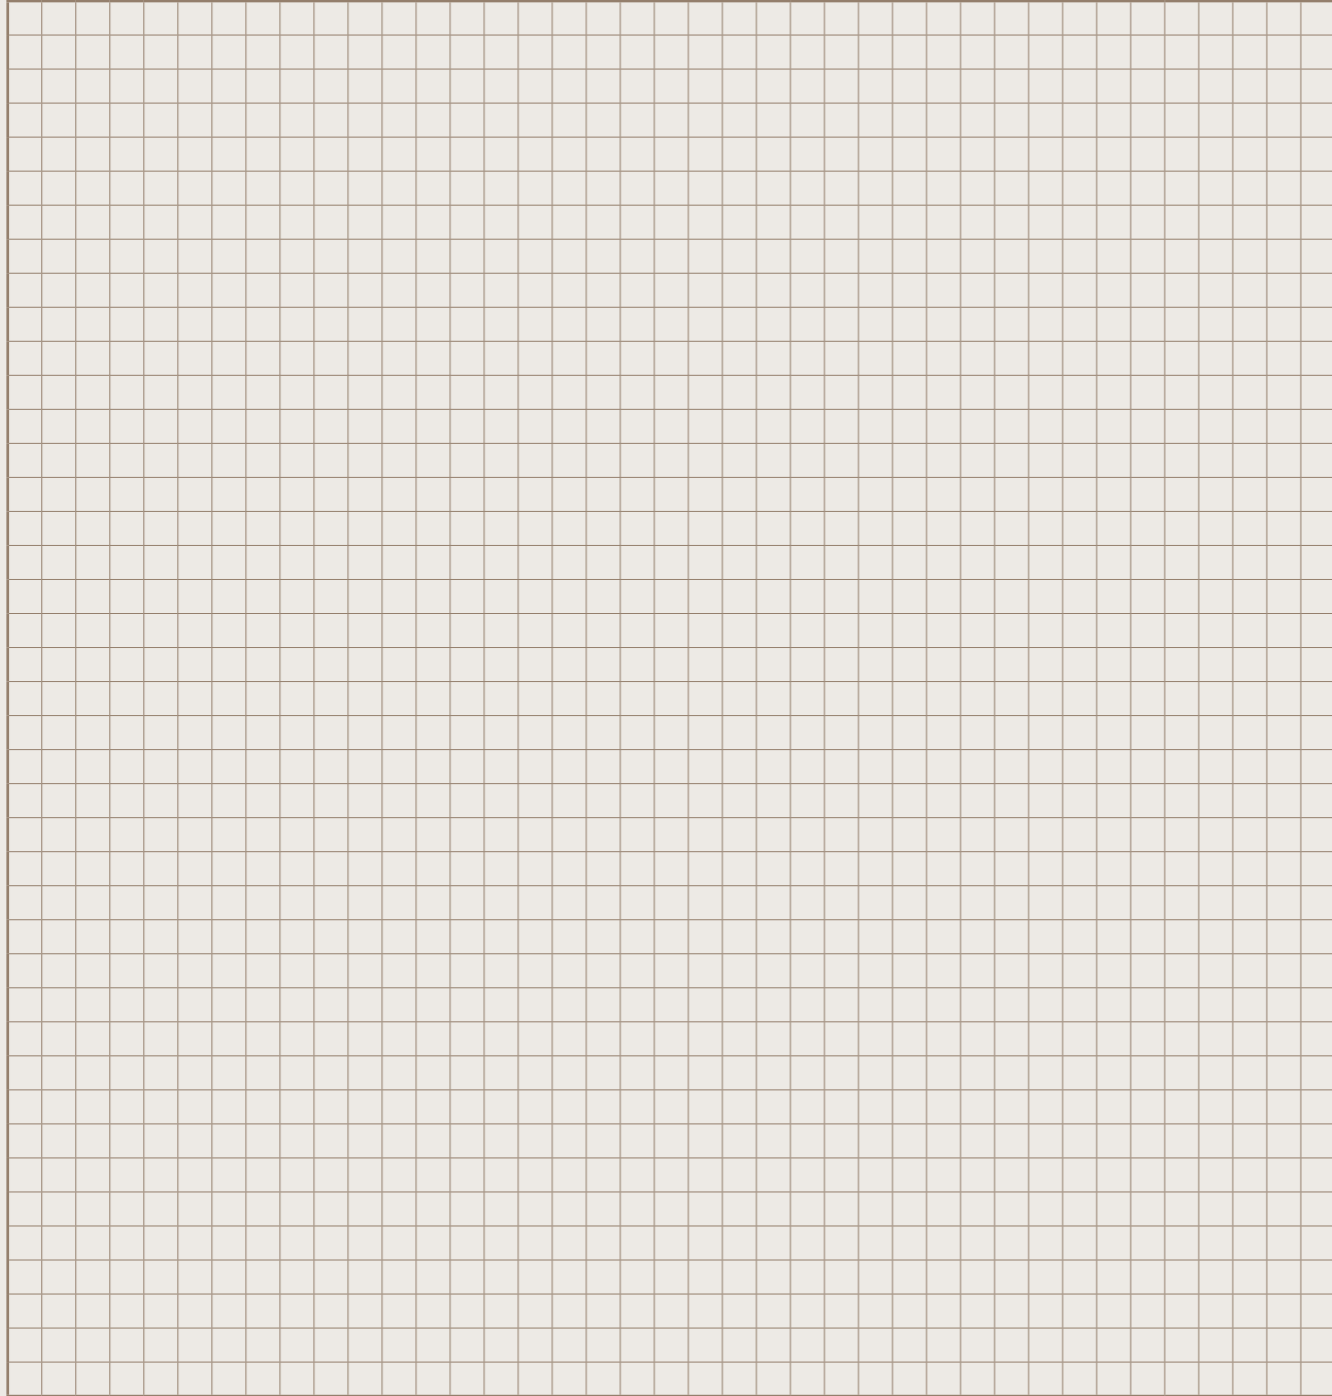

detrás de cada producto XTONE, hay un compromiso medioambiental a través de la creación de proyectos sostenibles que contribuyen a un mejor futuro. XTONE est une entreprise engagée envers l'environnement à travers l'utilisation de processus de production écologiques et la fabrication de produits plus innovants avec l'objectif de réduire l'impact environnemental.

L'usine de production de XTONE, qui a été créée en 2023, favorise l'autoconsommation énergétique et la récupération des ressources. Avec un total de 4475 panneaux solaires, ces installations permettent la récupération de 100 % de la chaleur du four pour la rediriger jusqu'au processus de séchage, la réutilisation de 100 % de l'eau via une station d'épuration à usage industriel et le recyclage de 100 % des déchets : un système complet de récupération des ressources - REGAIN.

En supposant des économies très importantes de matières premières, derrière chaque produit XTONE, il y a un engagement environnemental à travers la création de projets durables qui contribuent à un avenir meilleur.
